PROFESSIONAL SUMMARY

Senior Frontend Engineer with nearly five years building production web applications and 10 years of product-operations experience at Winamax. Primary frontend technical owner for TypeScript and Vue.js products, spanning architecture, technology selection, reusable component systems, accessibility, performance, automated testing, API contracts, and backlog definition.

Combines hands-on engineering with commercial and product judgment, powered by AI-assisted development (Codex, Claude), and an active specialization in agentic systems and UX.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL

Frontend: Vue.js (Vue3), Nuxt, React, Web Components, Vite, Storybook, Tailwind CSS

Backend and APIs: Node.js, Bun, REST APIs

Architecture: Feature-Sliced Architecture, Hexagonal Architecture, Reusable Component Design, Technical Documentation

Testing: Unit Testing, End-to-End Testing, Vitest, Playwright, Testing Library

Delivery and Tooling: CI/CD, GitLab CI, Jenkins, Docker

Web Quality: Web Accessibility, WCAG, ARIA, Core Web Vitals, Web Performance, Responsive Design

Cloud and AI: Cloudflare, LangChain & LangGraph, AI-Assisted Software Development

PROFESSIONAL EXPERIENCE

SENIOR FRONTEND ENGINEER

Raccourci Agency | La Rochelle, France | November 2021 - Present

- Frontend technical direction for TypeScript and Vue.js applications, owning architecture, UX, technology selection, and technical documentation.
- Vue 3 and TypeScript product development from inception, including native Web Components, for a product used by 10+ tourism destinations.
- Built and maintained an internal ERP that centralizes the agency's products and services and supports invoice-generation workflows for commercial teams.
- Developed and maintained user interfaces and components for AI-powered classification features.
- Modernized two production applications through Vue 2-to-Vue 3 and TypeScript migrations, supporting 100+ clients and 20+ integrations.
- Partnered with backend engineers to define REST API contracts and backlog priorities, balancing performance, maintainability, and business needs.
- Established unit and end-to-end testing with Vitest and Playwright. Maintained and improved Core Web Vitals thresholds, performance, and accessibility through WCAG and ARIA practices.

LIVE OPERATIONS MANAGER

Winamax | Paris, France | July 2010 - September 2019

- Managed platform planning and real-time operations for an online poker offering representing approximately €10M in monthly activity, including prize pools, liquidity, and promotions..
- Analyzed product performance and ran A/B tests to improve engagement and retention, supporting approximately 20% annual growth.
- Led cross-functional delivery across product, engineering, marketing, creative, and customer-support teams.
- Designed gamification and lifecycle-engagement mechanics to increase participation while meeting regulatory requirements.

MARKETING COORDINATOR

Winamax | London, United Kingdom | August 2009 - July 2010

- Localized online-gaming products for the French market, created promotional content, and launched offers across multiple channels.
- Coordinated product launches with B2B partners and cross-functional teams, aligning delivery and market communications.
